Grade 6–8 7:00–9:00 pm
Grade 9–12 8:00–10:00pm

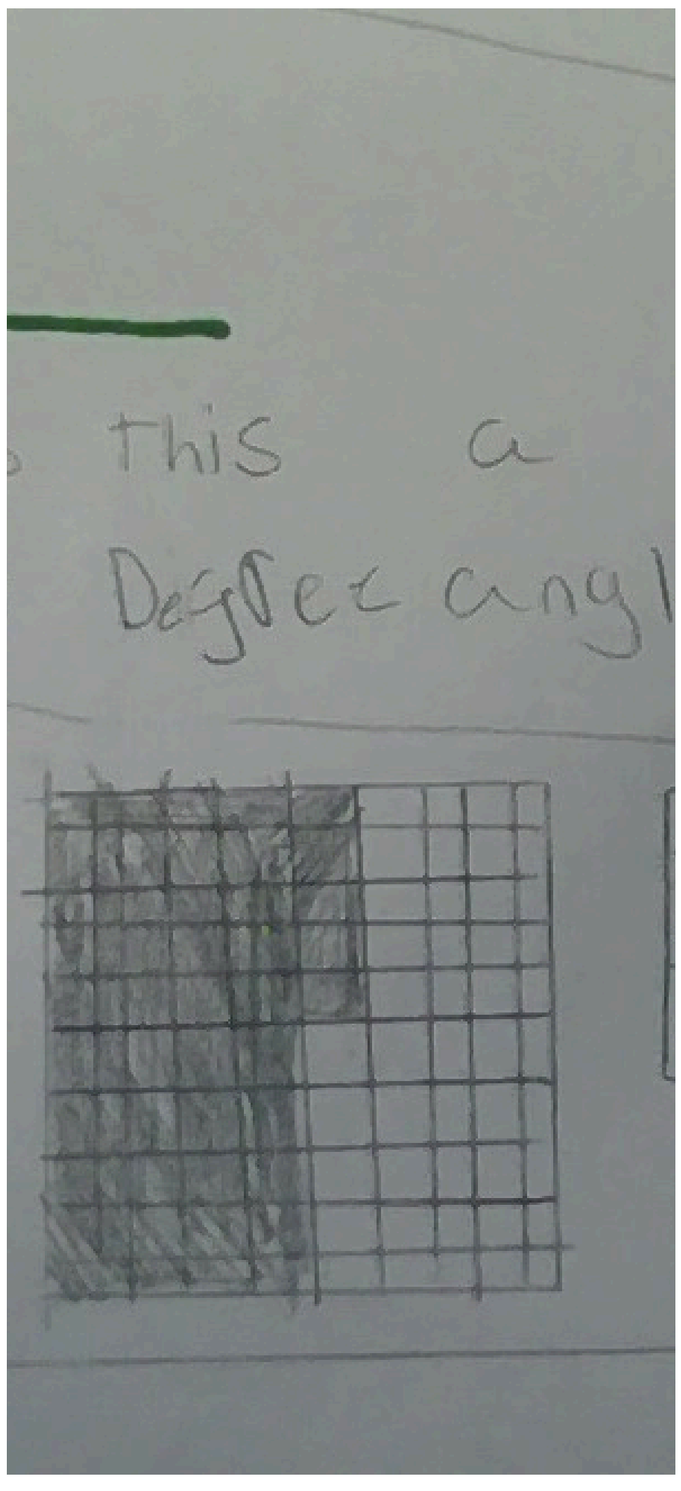

Things in the birdbuck store

Ceramic like shoes pigs and so many more
little fruit plushies
23 pencil
Handheld fans
Bead sorter
Some t-shirts
Bracelet making kit
Diamond dog picture
70n pcs drawing set
Go fish card game
Lots of stuffed animals
Hot wheels
2 100 pcs puzzle
book blast slap bracelets
Building blocks
7 playdoh
Tecdec

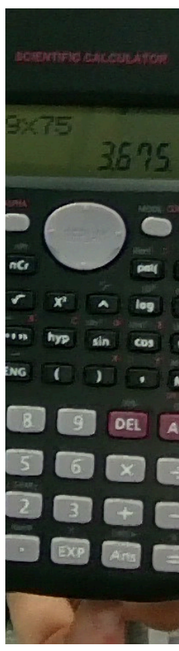

Opinion paper

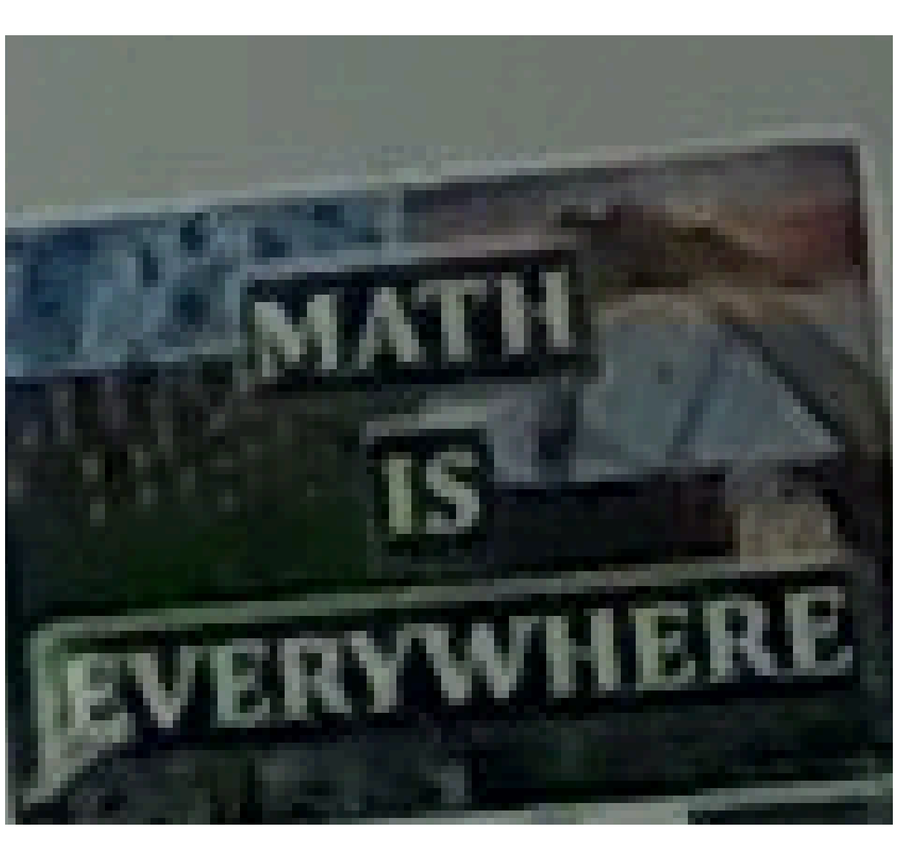

During our daily writing time we have been discussing why or why we should have homework. Some kids have their own opinion, like some think we should have homework but some don't. Some kids have been saying that "kids need to be kids" but some say, "we could use some work at home."

During our writing we had to check off stuff instead of having a sentence amount. Some things we had to have were stating your opinion at the beginning and end, flow, complete sentences, word choice and a couple more. At the end our teacher proofread it and we made any correction if needed.

Math is a important subject because it can repeat in your life like when your at a store counting money at a cash register.Also it is fun once you get a hang of it.If you play basketball when you shoot a you have to angle just right so you make it. Same as baseball cause you angle in the strike zone.

MIS COOKSONS FAVORITE THINGS

- favorite animal is a baby labradoodles

- favorite dessert is gluten free ice cream
- favorite candy flavor is green apple
- favorite meal is mashed potatoes
- favorite hoby is country dance
- favorite meat is steak
- favorite drink is mountain dew with flavors inside
- favorite place to eat is costa vida

SCIENCE Biology Summary

Gense if you have a tall dad and a short mom or vice versa then most likely the next gen(Generation) will be tall. Then statutes have found out the 2 gen of 4 kids 3 will be tall and thee other 1 will be most likely short.There are recessive(not inherent) and dominant(inherent) traits.For example dimples are inherent .Brown eyes are a dominant trait Blue eyes are recessive trait.

This is the classes fav food

Ok so now this is in the classes number order of the fav food, snacks, meal, and candy.

RA. Snickers, rommen, and popcorn.

RB. Butter fingers, pizza, and watermelon with mustard.

MH. Her-sheys, tocos, and cheetos.

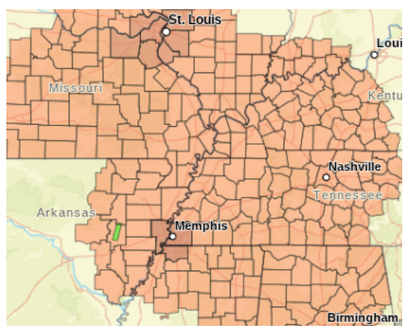

GH. Cookies and cream twixs, chicken, and peanut m&ms.

HM.suger free dark chocolate, saled, and talkis.

HP. Watermelon, sour patch kids, and rommen.

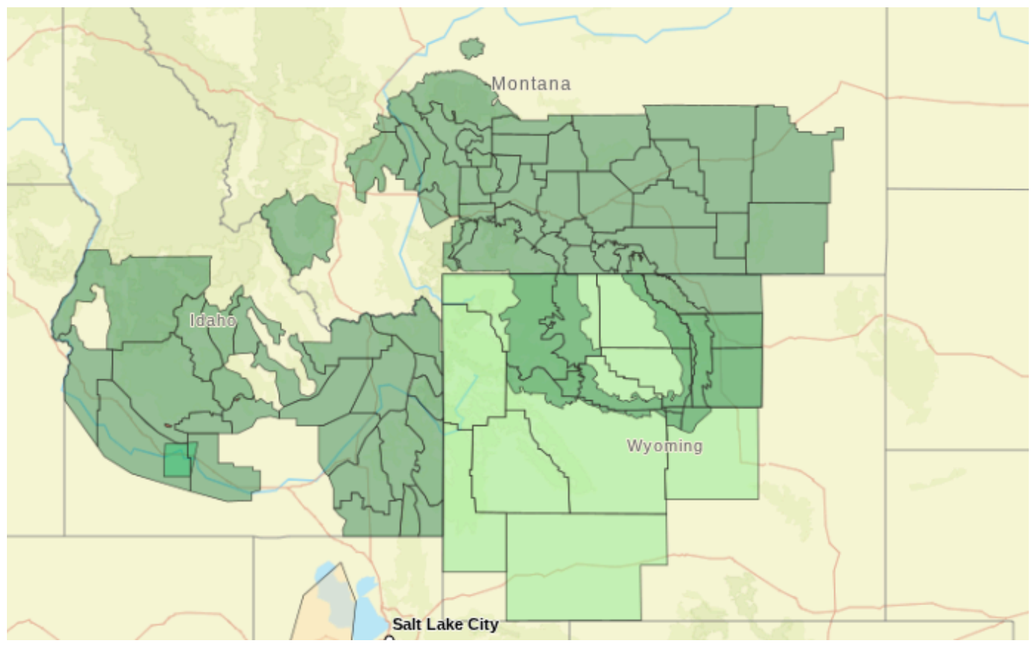

RR. Twixs, KFC, salt and vinegar chips.

The wether

The weather is a big deal and that's why we have these people called meteorologists. Meteorologists study the weather and tell the world how the weather is going to be. There are other people who chase the storms called storm chasers, storm chasers also track weather but not just any other weather they chase storms like tornados, hurricanes, typhoons, floods, and severe thunder storms. Let's talk about tornados first, tornados have a scale called the ef scale. The ef scale is how bad the tornadoes are, the ef scale goes from ef1 witch is the weakest up the ef5 witch is the strongest. How a tornado forms it where the warm weather mixes with the cold weather and the moist air helps the tornado form. Now let's talk about hurricanes, hurricanes are bigger than a tornado but less damage. Did you know hurricanes are so big you can see them in space? Well now you know, hurricanes form on water and move to land to destroy a town or a city. There are also categories for a hurricane. From category 1 witch is the weakest and category 5 witch is the strongest. Alright now lets talk about typhoons, typhoons are basically hurricanes but near japan. Now lets talk about severe thunderstorms, severe thunderstorms is a thing NOT to mess with. Severe thunderstorms are just as bad as a tornado but instead of wind thunderstorms use lighting and hail. Hail is ice that falls from the sky and it can be dangerous. Lighting is a flash of electricity and it too is also dangerous

Hi my name is Raiden, and I am doing a paragraph on prodigy. Ok so prodigy is a game you are able to play on your computer when you have free time, and prodigy is a game where you can do either math, social studies, and ela, but all of them are different then one another. When you play the math map you run around and fight other animals with the animals you have already collected by fighting earlier in the game, and if you win the battle you get battle stars to upgrade yourself and your animals so they can do more abilities. When you play the social studies map you have energy, and when you run out of energy you have to answer social studies questions, and if you get them right you get more energy to roam around and build more stuff like houses, barns, and other things. When you play the english map you go around and chop down trees, and get money to upgrade your axe and chop down trees faster and faster every time you need to get wood for a build you are doing or a quest you need to complete to get money or something else to help you do what you are doing faster and more efficiently, you can also go collect rocks, sticks, flowers, and other things to help you build even more things.
